### **Confirmation of records for plastics used on leased seabed areas (from the sea surface to the seabed)**

I/we confirm that;

[REDACTED]

has maintained appropriate records for the above reporting period that reflect the procurement and disposal of plastics used on the listed seabed lease location(s) as part of measures employed to minimise the risk of losses to the marine environment and responsible disposal of plastic waste.

These records support the changes to procurements and disposal means reported below.

Relevant records of plastic procurements, stock and means of disposal employed for waste and redundant items used on leased sites will be retained for a minimum period of 5 years and will be made available to CES representatives on request during site visits.

## 1. Management of plastic in this reporting period

- (i) The comparison of records for the current and previous reporting period indicates that aggregated procurements of **multi-use plastics** deployed on leased sea-sites has remained the same (delete as appropriate).

*Plastic use has remained the same and has not increased or decreased.*

- (ii) The comparison of records for the current and previous reporting period indicates that our aggregated procurements of **short term/ single-use plastics** used on leased sea-sites has remained the same (delete as appropriate).

*Plastic use has remained the same and has not increased or decreased.*

- (iii) The comparison of records for the current and previous reporting periods indicates that **changes to the proportion of waste plastic from leased sea-sites disposed of by recycling, re-use or to landfill** are as set out in Table 1 below.

**Table 1: Aggregated changes to disposal methods across waste and redundant plastic used on lease sites in this reporting period.**

(Tick as appropriate or enter 'n/a' if the disposal method is not used by your company for waste plastics disposal)

	Decrease	<input type="checkbox"/>	<input type="checkbox"/>
	Stay the same	✓	✓

The [increases and/or decreases](#) in different disposal means listed in Table 1 are due primarily to the following reasons: (refer to [Guidance for completing the Management of Plastics: Aquaculture Leaseholders Report](#)).

*Not relevant – no increase or decrease.*

*(Tenants may wish to comment on relative proportions of the different waste plastic disposal methods from their sea-sites, particularly where high levels of recycling are consistently achieved).*

## **2. Improvements in management of plastics on leased sea-sites**

*Please provide any information you wish to share on measures undertaken over the reporting period regarding improvements in the management of plastics.*

*We recycle as much plastic as possible – e.g. use ropes and floats for multiple years rather than dispose of them.*

## **3. Opportunities and challenges**

*Please comment on any opportunities, challenges and mitigating circumstances relevant to management of plastic used on leased sea-sites during the reporting period which you would like to share.*

*No immediate problems evident – we do not generate much plastic waste at the seaweed farm, and our plastic equipment is used for multiple years.*

## **4. Any other relevant information**

*Please comment on any other factors you wish CES to be aware of regarding plastic use or waste management on your leased sites.*

*Insert your response here.*

*None at this time.*
