

## Culzean Floating Wind Pilot – Outlook Statement

### Supply Chain Commitments and Ambitions

The tables included within this SCDS document outline the anticipated levels of expenditure for the project. The commitments table (Table 1) outlines the minimum expenditure committed throughout the life of the project, broken down by geographical area and project stage (where operations are capped at 6 years). The ambitions table (Table 2) provides a more idealised reflection of the project's potential supply chain expenditure, with aims to increase the level of local investment to economically benefit the Scottish and UK-wide supply chain.

**Table 1 - Supply Chain Commitments**
