

## MANAGEMENT OF PLASTICS: AQUACULTURE LEASEHOLDERS REPORT

### Management of Plastics – reporting information

### Confirmation of records for plastics used on leased seabed areas (from the sea surface to the seabed)

I/we confirm;

[REDACTED]

has maintained appropriate records for the above reporting period that reflect the procurement and disposal of plastics used on the listed seabed lease location(s) as part of measures employed to minimise the risk of losses to the marine environment and responsible disposal of plastic waste.

These records support the changes to procurements and disposal means reported below.

Relevant records of plastic procurements, stock and means of disposal employed for waste and redundant items used on leased sites will be retained for a minimum period of 5 years and will be made available to CES representatives on request during site visits.

#### **1. Management of plastic in this reporting period**

The site operated on an almost dormant basis during the period due to negative impacts from apparent environmental factors inhibiting stock.

#### **2. Improvements in management of plastics on leased sea-sites**

The site is managed according to current best practice and in accordance with ASSG guidelines on site management and the environment.

**3. Opportunities and challenges**

*Losses of equipment have been minimal due to clement weather conditions over the period.*

**4. Any other relevant information**

*There has been a reduction of 3 floats on the farm site as they have been taken ashore and are in storage. There were no disposals.*

**5. Report Completed by:**
