

# MANAGEMENT OF PLASTICS: AQUACULTURE LEASEHOLDERS REPORT

### Management of Plastics – reporting information

# Confirmation of records for plastics used on leased seabed areas (from the sea surface to the seabed)

I confirm that;

has maintained appropriate records for the above reporting period that reflect the procurement and disposal of plastics used on the listed seabed lease location(s) as part of measures employed to minimise the risk of losses to the marine environment and responsible disposal of plastic waste.

These records support the changes to procurements and disposal means reported below.

Relevant records of plastic procurements, stock and means of disposal employed for waste and redundant items used on leased sites will be retained for a minimum period of 5 years and will be made available to CES representatives on request during site visits.

#### **Data Privacy**

Crown Estate Scotland will process your personal data as part of its public task, in line with our responsibilities under the Data Protection Act 2018 and UK General Data Protection Regulation (UK GDPR).

This will include your personal data, such as full name(s), addresses and other information which may be included in this report. Please select one of the following options:

X I am aware that my personal information will be published on the Crown Estate Scotland website as part of the Management of Plastics reporting

X I am aware that Crown Estate Scotland require my personal data as part of the Management of Plastics reporting, but I do not wish for these to be published on the Crown Estate Scotland website

For further information about how Crown Estate Scotland process your personal data and for information about your data subject rights, you can find our privacy notice on our website.

### 1. Management of plastic in this reporting period

(i) The comparison of records for the current and previous reporting period indicates that aggregated procurements of **multi-use plastics** deployed on leased sea-sites has increased

This <u>increase</u> was due primarily to the following reasons (*refer to Guidance for completing the Environmental Management of Plastics: Aquaculture Leaseholders Report*).

*Insert your response here.* 

We were waiting on oyster spat before deploying cages. As spat became available we bought polysteel rope from which to attach the AP60 cages.

(ii) The comparison of records for the current and previous reporting period indicates that our aggregated procurements of **short term/ single-use plastics** used on leased seasites has <u>decreased</u>).

This <u>decrease</u> was due primarily to the following reasons: (refer to Guidance for completing the Environmental Management of Plastics: Aquaculture Leaseholders Report).

Insert your response here. We have not had to buy more cable ties.

(iii) The comparison of records for the current and previous reporting periods indicates that changes to the proportion of waste plastic from leased sea-sites disposed of by recycling, re-use or to landfill are as set out in Table 1 below.

# <u>Table 1: Aggregated changes to disposal methods across waste and redundant plastic used on lease sites in this reporting period.</u>

(Tick as appropriate or enter 'n/a' if the disposal method is not used by your company for waste plastics disposal)

Disposal method	Change from la reporting period	st Single use (V)	Multi use (√)
Recycling			
	Stay the same		
Re-use/re-purpose			
	Stay the same		
Licensed Landfill			
	Stay the same		
Licensed			
Incineration-		V	
licensed (on-site is illegal)	Stay the same		
Other means of			
disposal.			
Please insert details	Stay the same		

The increases and/or decreases in different disposal means listed in Table 1 are due primarily to the following reasons: (refer to <u>Guidance for completing the Management of Plastics:</u> Aquaculture Leaseholders Report).

Insert your response here. We have deployed very few cages and are not using many disposable things.

(Tenants may wish to comment on relative proportions of the different waste plastic disposal methods from their sea-sites, particularly where high levels of recycling are consistently achieved).

### 2. Improvements in management of plastics on leased sea-sites

Please provide any information you wish to share on measures undertaken over the reporting period regarding improvements in the management of plastics.

Insert your response here. (An additional page is provided at the end of the document if required).

Last year we had not deployed many cages due to spat shortages, we had most of our plastic equipment bought and ready to go, bar the rope. This year I only have one nursery in the water, and it does not have the full complement of cages on it, as we still have spat shortages. Due to the short length of time that the kit has been in the water we have not had to replace anything yet.

### 3. Opportunities and challenges

Please comment on any opportunities, challenges and mitigating circumstances relevant to management of plastic used on leased sea-sites during the reporting period which you would like to share.

Insert your response here.

We have not had cause to dump any plastic yet so have not faced any challenges.

#### 4. Any other relevant information

Please comment on any other factors you wish CES to be aware of regarding plastic use or waste management on your leased sites.

Insert your response here.

## 5. Report Completed by:

om

Once complete, please send your Annual Report by e-mail to: aquareporting@crownestatescotland.com

Please title the e-mail as the Annual Plastic Report (year) for (your company name).

Or, tenants may post their completed Annual Report to the Crown Estate at the below address.
